Flat 2 Weston House

15-25 Winchester Avenue

London

NW6 7TS

As a recent graduate I am looking for a junior role within the digital sector where I can develop my keen interest in technology and programming. I love learning new skills and have a strong work ethic, as shown in my school work, previous employment and hobbies. I also work well in a team, having management experience in both university and other exploits.

Skills

I am experienced with different development methods and team working practises, such as agile and scrum methodologies. I also have experience of working with clients on live briefs.

Java/Swift/Objective C/C++/ Python

Using different languages to create different applications. I have experience with using different libraries to integrate hardware such as cameras, depth sensors and accelerometers.

Node/ Composer

Experience with dependency managers to create complex apps using libraries such as Box 2D, Phaser, Express, Socket.io and Johnny Five.

PHP/ Javascript/ HTML 5/ CSS 3

Creating dynamic websites and interactive web experiences.

Arduino/ Particle/ Raspberry Pi

Working with programming micro-controllers and designing and building electronics to create physical digital artefacts.

Photoshop/Illustrator

Using industry standard software to create design solutions.

Employment History

May 2015 – September 2015 –Rhythm Digital Manchester

Placement at Rhythm Digital in the heart of Manchester's creative Northern Quarter. Here I worked with the team to complete projects, doing research and development work as well as illustration and graphic design. During my time at Rhythm I also created a demo application for Intel's Real Sense camera which can be found on my portfolio.
